

JEFFREY LIN

ASSOCIATE / ST. LOUIS METRO OFFICE

Jeffrey Lin helps clients develop intellectual property strategies that leverage their ideas and inventions and bring those concepts to market. He is focused on innovations at the intersection of life sciences, technology, and commerce.

Jeffrey is involved in safeguarding intellectual property for clients, primarily handling patent prosecution and the preparation of legal opinions regarding patentability and infringement. He counsels clients on office action response strategies, outlining potential arguments and their use for intellectual property portfolio protection. He also assists with patent litigation preparation, including conducting research and analyzing potential patent infringement.

Jeffrey has experience analyzing large IP portfolios for strategic protection opportunities. He has worked to analyze international pharmaceutical patent portfolios, creating recommendations for streamlining, addressing potential vulnerabilities, and highlighting additional IP protection avenues.

He is especially interested in helping businesses evaluate and analyze artificial intelligence's impact on outcomes as they relate to IP structures and business success. His biology-related experience and studies give him insight into the work clients do to develop sustainable solutions across the health sciences sectors.

PRACTICE AREAS

Patents; IP Litigation

INDUSTRIES

Chemistry & Materials Science; Pharmaceutical & Biotechnology

BACKGROUND

Jeffrey is a recent graduate of the Saint Louis University School of Law. While in law school, he was active in the Student IP Law Association and the Asian American Law Student Association, serving as president of both groups. He also served as the language group vice president of the school's International Law Students Association. His prior work experience includes an externship with the St. Louis County Prosecuting Attorney's Office where he argued in preliminary hearings. He also earned intern- and externships with pharmaceutical and healthcare companies, where he gained experience in international IP portfolio management. He earned a Master of Science

degree in biology, where he focused on antifungal drug discovery, also from Saint Louis University.

Jeffrey is passionate about the communities in which he lives and works. During his education, he was a leader and member of several Asian American student associations and is currently active in the Missouri Asian American Bar Association.

He enjoys collecting vinyl records, physical fitness, playing acoustic guitar, and traveling.
