

JEWELL N. BRIGGS

ASSOCIATE / DETROIT METRO OFFICE

Jewell is known for bringing a relentlessly driven work ethic to all facets of intellectual property law representation. She is guided by a firsthand appreciation for intellectual property's potential to change lives.

Her practice includes preparing and prosecuting patent applications for a range of new technologies, conducting trademark clearance searches, and providing litigation support. She counsels clients across a range of industries, from chemical and biopharma laboratories to large electrical and heavy equipment and manufacturing companies.

With three degrees in the hard sciences and previous experience in nursing, Jewell has a uniquely varied skillset and perspective on IP representation. She has a particular interest in helping healthcare innovators develop and protect intellectual property that improves disease outcomes and patient quality of life. She is highly proactive in matters that require comprehensive research and collaborative thinking. Clients and colleagues alike appreciate her frank approach to developing solutions that are efficient, strategic, *and successful*.

Jewell is a member of Harness IP's Chemistry & Materials Science practice group. She regularly conducts continuing legal education for her colleagues and provides frequent legal and technology updates to the firm. She is a 2022 graduate of the Leadership Council for Legal Diversity Pathfinder Program, which provides foundational leadership skills and networking opportunities for up-and-coming diverse attorneys.

PRACTICE AREAS

Patents; Trademarks & Service Marks; IP Litigation

INDUSTRIES

Automotive & Autonomous Vehicles; Chemistry & Materials Science; Mechanical & Electromechanical; Pharmaceutical & Biotechnology

BACKGROUND

Jewell's experience in nursing, her vast knowledge of the hard sciences, and her firsthand understanding of the value of innovation gives her a unique perspective on intellectual property protection. A hearing impairment only sharpens her conviction that technological innovation can and should improve lives. Her practice enables her to combine her passions for law and science for the benefit of the firm

B.S., *cum laude*, Forensic Science, Loyola University Chicago, 2013

B.S., *cum laude*, Chemistry, Loyola University Chicago, 2013

BAR & COURT ADMISSIONS

Michigan

Eastern District of Michigan

U.S. Patent and Trademark Office

KEY MATTERS

- Helped secure a dual victory for two clients accused of patent infringement by developing a bold strategy challenging the validity of the plaintiff's patents. Petitions for *inter partes* review (IPR) of the plaintiff's patents were initiated at the United States Patent and Trademark Office (USPTO), and the USPTO issued comprehensive opinions in the IPRs, rendering all claims in four out of the five patents as unpatentable. The U.S. Court of Appeals for the Federal Circuit upheld the decision, and the fifth patent is currently under IPR at the USPTO.
